Report of: Donald A. Sonney
Date: Wednesday, August 27, 1997
Re: Roberts, Clarence
Activity: Contact with Ohio Highway Department

On the above date the investigator contacted the Ohio Highway Department and requested information concerning a deer carcass which may have been found on or near I-77 in the vicinity of Buffalo, Ohio on or after the date of 5/17/97. The employee at the Highway Department indicated that they would determine if such a carcass was found and would call the offices of SPI back with that information.

Several days later an employee of the Highway Department called the offices of SPI and indicated that they had not found a deer carcass in the vicinity on, around, or shortly after that date.

Re: Roberts, Clarence
Activity: Contact with Ohio Bureau of Criminal Identification and Investigation

On the above date investigator Donald A. Sonney contacted Special Agent Michael Kopfer and inquired as to whether telephones identified as B-1 and B-10 on the Evidence Inventory Sheet related to the above referenced subject were two separate telephones, or if they were one telephone listed twice. Special Agent Kopfer responded that the phones listed as B-1 and B-10 were two different phones.

The investigator then asked if latent prints were ordered from the phones and if comparisons to all three suspects in the case were made, to which he responded that he could not divulge that information, but the Prosecutor in the case would have to make the decision whether or not to release that information.
