RE: Defendant Curtis Downing  
event #'s: 930601-0256 - victim Swanson *Dismissed*  
930121-0372 - victim Chiles } *trial on both cases*  
930118-1767 - victim Zold

Dear John,

The purpose of this letter is to advise you of a telephonic conversation conducted on 11-17-93 with Melissa Webber, a scientist with Cellmark Diagnostics, as a status check on the above referenced cases.

The Swanson case is currently in review with a match reported between the vaginal swab and Curtis Downing. A report was received today on the Zold case, where a band pattern matching Curtis Downing was reported. A copy of this report is enclosed for your files. Statistical analysis of these two cases is not yet available and will be provided in separate reports.

Unfortunately, although I am aware that we have a court date this month on Chiles, I would advise you to request a continuance.

Ms. Webber advised me that results on this case are several months away. I will certainly keep you advised as I receive additional information on all three cases.

Call me if you have any questions.

Sincerely,

JOHN MORAN, SHERIFF
