District Attorney  
403 South Main Street  
Marksville, Louisiana 71351

RE: KAREN SANDERS

Dear Mr. Knoll:

Karen Sanders, accompanied by Sheriff's Deputy Barbara Decuir came to my office with her twin sister on 5-24-77 to be examined. She stated that she has been a resident of Marksville for 2 months. She said that she was raped on May 9, 1977 in a car. A person known as Vincent Simmons pulled a gun on Keith Labarde, her 18 year old cousin, at 9:00 PM at the 7-11 store. He made them drive down a road known as Little California. He first put her and Keith in the trunk of the car while he raped Sharon.

She stated that she first had intercourse 9 months ago with Robert Jackson of Alexandria. She said that it hurt and she bled the first time she had intercourse. She did not bleed on May 9, 1977, but it hurt.

She told me that they did not report the incidents until 2 weeks later when they told her first cousin who told her aunt and uncle. Their mother and father are divorced and the mother lives in Alexandria and the father lives in Shreveport.

Her last menstrual period was one week before the rape and she has had no period since. She states that the person known as Vincent Simmons made her have oral sex with him after the rape. The physical examination showed her breasts to be normal and her development was normal for a 14 year old female. There were no bruises on her body. The vaginal examination showed a discharge which I diagnosed as being yeast and epithelial cells. A Gram stain was done and it was negative. A 2 hour UCG test for pregnancy was done and it is negative at this time. I was able to do a vaginal examination on Karen in the usual manner, that is, manually and with a speculum.

Sincerely,

F. P. BORDELON, JR. MD
